APPLICATION ACCEPTED

Notice is hereby given that the person interested in opposing the grant of Patents to any of the applications referred to below at any time within four months from the date of this Patents' journal may give notice at the Patent Office on the prescribed Form P-7 of the Patents Rules 18(1) of 2003.

The six figures number shown in the right hand side are those given to applications on acceptance of the complete specification under which the specification will be printed and subsequent proceeding taken.

The figures shown within square brackets after the title of inventions indicate their classification index at acceptance.

Typed copies of the specification which are to open to public inspection can be supplied by the Patent Office on payment of the prescribed charges which may be ascertained on application to the office.

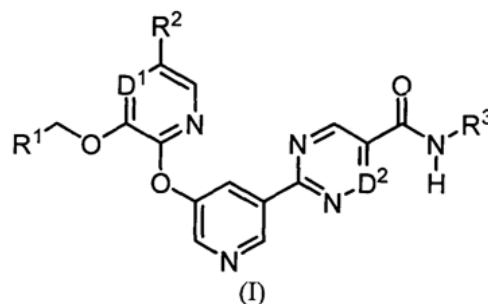

532/2016 TOYO ENGINEERING CORPORATION, Japan.—“UREA MANUFACTURING METHOD AND UREA MANUFACTURING APPARATUS”.

C07C273/04 & C07C275/00.

143602

Provided are urea manufacturing method and apparatus, which can increase the conversion ratio into urea and to reduce the consumption of steam. The temperature of the reactor is increased by introducing the entire amount of raw material ammonia and introducing a portion of the decomposed gas from the stripper into the reactor. The raw material ammonia is preferably heated using the steam condensate generated in the purification step, and the steam generated by the heat of condensation of the decomposed gas and the unreacted substances in the condensation step. The heating temperature is preferably between 70 and 140°C.

The present invention provides a compound of Formula (I)

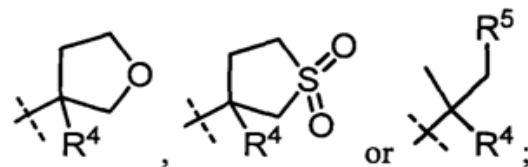

wherein

D¹ and D² are each independently N or CH; R¹ is H, or (C₁-C₂)alkyl optionally substituted with one or two substituents each independently selected from fluoro and (C₃-C₆)cycloalkyl;

R² is H or fluoro;

R³ is,

R⁴ is H, cyano, or (C₁-C₄)alkyl optionally substituted with one or two substituents each independently selected from —OH and —S(O)₂R⁶;

R⁵ is H or —OH; and

R⁶ is (C₁-C₄)alkyl.

The compound of Formula I is therapeutically effective in the treatment of diseases linked to the activity of the diacylglycerol acyltransferase 2 (DGAT2).
