The mean volume diameter of particles of active ingredients (a) flonicamid and (b) buprofezin, is from 0.1 μm to 20 μm. The present invention solves the problem of the prior art such that if a water-based

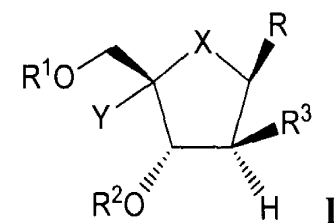

pesticidal suspension containing (a) flonicamid and (b) buprofezin as active ingredients is stored for a long period of time, the active ingredient particles will grow and become coarse during storage, and a stable suspension is hardly obtained.
